

# Haoming (Harvey) Chen

Houston, TX | [hc80@rice.edu](mailto:hc80@rice.edu) | [github.com/HC-SGW](https://github.com/HC-SGW) | [LinkedIn](#)

**Research Interests:** Graph machine learning, generative modeling, flow and diffusion models, network inference, and computer vision

## Education

---

### Rice University

*B.S. in Electrical and Computer Engineering; GPA: 3.98/4.00*

**Houston, TX**

*Expected May 2027*

**Selected Coursework:** Honors Linear Algebra; Machine Learning: Concepts and Techniques; Introduction to Computer Vision; Learning from Sensor Data; Random Signals.

## Honors & Awards

---

- **Louise J. Walsh Scholarship**, Rice School of Engineering, 2025-2026 (\$1,500 merit award based on academic record).
- **President's Honor Roll**, Rice University, Fall 2023 and Spring 2025.
- **Member, IEEE-Eta Kappa Nu (HKN)**, the electrical and computer engineering honor society, Theta Rho Chapter; inducted 2026.

## Publications

---

**Harvey Chen**, Nicolas Zilberstein, and Santiago Segarra. *Prior-Informed Flow Matching for Graph Reconstruction*. Accepted at the ICML 2026 Workshop on Structured Probabilistic Inference & Generative Modeling (SPIGM) [Paper] [Workshop] [Code]

## Research Experience

---

### Research Assistant

*Rice University, Advisor: Prof. Santiago Segarra*

**May 2025 - Present**

*Houston, TX*

- Developed Prior-Informed Flow Matching (PIFM), a rectified-flow generative framework for missing-edge graph reconstruction conditioned on structural priors such as Node2Vec and GraphSAGE.
- Developed and maintained a PyTorch-based research codebase for graph reconstruction and link-prediction tasks across diverse graph datasets; evaluated link-prediction performance and graph-distribution metrics against baseline methods.
- Led experiments, analysis, figure preparation, and writing for a first-author paper accepted at the ICML 2026 SPIGM workshop.
- Developing a constraint-aware version of PIFM using primal-dual guidance during model inference.

### Undergraduate Researcher, Trust & Responsibility Summer Research Program

**May 2026 - Present**

*Rice University, Advisor: Prof. César A. Uribe*

*Houston, TX*

- Developing an occupation translator that represents occupations as task graphs and aligns taxonomies across time and systems using task embeddings, clustering, subgraph construction, and fused Gromov-Wasserstein optimal transport.
- Built an extraction and embedding pipeline for O\*NET releases and ESCO/ISCO taxonomies to examine occupation splits, merges, task reorganization, and ambiguous matches.

## Presentations

---

**Harvey Chen.** *Prior-Informed Flow Matching for Graph Reconstruction*. Oral presentation, Gulf Coast Undergraduate Research Symposium (GCURS), Rice University, Houston, TX, Oct. 18, 2025.

## Teaching Experience

---

### Teaching Assistant

Spring 2026 - Present

*Rice University, Department of Electrical and Computer Engineering*

*Houston, TX*

- ELEC 241: Fundamentals of Electrical Engineering I (Fall 2026)
- ELEC 242: Signals, Systems, and Transforms (Spring 2026)
- ELEC 378: Machine Learning: Concepts and Techniques (Spring 2026)

## Selected Projects

---

### Speech Emotion Classification

Spring 2025

- Built and evaluated a machine-learning model that classifies emotions from short voice clips; the team achieved the highest classification accuracy among course groups.

### NeuralSeed Real-Time Guitar Pedal *[Repository]*

Spring 2026

- Integrated an RTNeural GRU model into C++ firmware for a Daisy Seed embedded audio platform, enabling real-time neural amplifier and effects processing.
- Ported machine-learning and digital signal-processing components to the board and developed the project website for the team demonstration.

## Mentoring & Service

---

### Rice Catalyst Eureka Outreach Program Mentor

Nov. 2024 - Sept. 2026

*Rice University*

*Houston, TX*

- Mentor Houston-area high-school students on research design, literature reviews, technical writing, and oral presentations; advise student submissions to the Rice Eureka research journal.

## Technical Skills

---

**Programming:** Python, Java, Go, HTML/CSS, TypeScript, C#, C

**Machine Learning and Data:** PyTorch, PyTorch Geometric, scikit-learn, NumPy, pandas, SciPy, NetworkX, POT, Matplotlib

**Tools:** Git, Linux, LaTeX, Unity
